THE GIANT TREES. - A correspondent of the San Francisco Examiner, in speaking of the bg trees of Calaveras county, says: In the stump of eac of these a ball room, thirty feet across, is built, and it requires a ladder of eiglteen steps to second to the top of the low, on which was built a ter-pin alley. It has been burned up, but the bedy of the old, charred monarch of the for st still remates. Thick of it-a bellow leg. through which one can rid on,hers: back and come out through a knot-hole There are some cinery of these big trees, measu ing from 50 to 100 leat in circumference, and reaching up to the skies-from 300 to 450 feet. From the rings that denote the annual growth of these trees, science has estimated some of them to be 4,000 years old, while they stand over the fallen hodies of a much nide growth, covered over with earth and large growing trees, as it is one of the problimities of this timber not to decay. It appears to be a species of red-wood.
